Risk and Reward Profile

The category is based on historical data and is based on price movements in the share class (volatility), and may not be a reliable indicator of future risk. The risk category is not guaranteed to remain unchanged, and may change over time.

A share class with the lowest risk rating does not mean a risk-free investment.

This share class is in category 6 as it invests in equities or equity-related securities that can vary significantly in price from day to day due to a variety of factors.

The following material risks may not be adequately captured by the risk and reward indicator:

Investments through the Stock Connect programme may be subject to additional risks, including liquidity, operational, clearing, settlement, market suspension, custody and quota limitation risks.

The Fund does not have any guarantees and the value of investments may rise or fall. You may not get back the original amount of money you invested. In addition, the Fund may be subject to the following risks:

Market risk - The Fund invests in equities or equity-related securities, and these can rise or fall due to a number of factors affecting individual companies and local or global stock markets.

Emerging markets risk - Investing in emerging markets carries a higher risk (e.g. larger price fluctuations) than a developed market.

Some of the investments may be subject to low liquidity, making them hard to buy or sell at short notice.

Operational risk - The inability to make timely security purchases or disposals due to administrative/settlement problems may result in missed potential gains or undesirable losses to the Fund.

Counterparty risk - The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Exchange rate risk - Changes in foreign currency exchange rates may adversely affect the value of the investments held in the Fund. Shareholders investing in a currency other than the Fund's base currency should be aware that exchange rate fluctuations may affect the value of their investments.

Regional risk - The Fund invests mainly in countries of the Emerging Asia ex China region, thus the share price and currency volatility are generally higher in emerging markets than developed markets.

Foreign investment risk - Some countries in Emerging Asia ex China may prohibit or impose substantial restrictions on investments by foreign investors and such restrictions may change from time to time.

Derivatives risk - Financial derivative instruments are complex instruments whose performance and value are directly linked to the performance or value of underlying assets and will fluctuate depending on the market of such underlying assets. There can be no assurance that the objective sought by using derivatives will be achieved. The use of derivatives may result in greater fluctuations of the net asset value of the Fund.

(Please refer to the "Risk Factors" section of the prospectus for a more detailed description of the risks pertaining to the Fund.)
